## Studies on Accretion Dynamics around a black hole in Active Galactic Nuclei(AGN): Effects of galactic potentials.

In this work, we present a detailed study and a complete analytical investigation of the critical behavior of the accretion flow and the nature of the phase trajectories corresponding to the transonic accretion in the context of these massive elliptical galaxies by incorporating the effect of the entire gravitational potential of the host galaxy in the presence of cosmological constant.

### Presentation Type

Poster

**Primary author:** SK, Ripon (West Bengal State University)

**Co-author:** Dr NAG, Sankhasubhra (Ramakrishna Mission Vivekananda Centenary College, (An Autonomous College under WBSU), Rahara.)

**Presenter:** SK, Ripon (West Bengal State University)

**Session Classification:** Posters

**Track Classification:** Posters
